COMPUTER SCIENCE STUDENT

Jimma University, Ethiopia | Third-Year Undergraduate
Cybersecurity Enthusiast | Full-Stack Developer | Aspiring Data Analyst

PROFESSIONAL PROFILE

Passionate Computer Science student dedicated to building secure technology and turning ideas into solutions. Focus on hands-on practical project development, API security, and systems analysis.

EDUCATION

Jimma University, Jimma, Ethiopia
Bachelor of Science in Computer Science - Currently in Third Year
Key Coursework: Data Structures & Algorithms, Database Systems, Computer Networks, OOP

PRACTICAL PROJECTS

1. SecureAPI Guard (Node.js, Express.js, Helmet, Express Rate Limit)
- Educational API security gateway featuring request rate-limiting, HTTP headers defense, and logging.

2. MiniIDS (C++, File Handling, Log Analysis)
- Intrusion detection project analyzing authentication logs for suspicious activities and IP blacklists.

3. DEL FRE School Student Registration System (Concept & WIP)
- Registration system concept managing student enrollment and administrative workflows.

4. Visit Jimma Web Project (HTML5, CSS3, JavaScript - Concept)
- Web concept showcasing Jimma's rich culture, historical attractions, and visitor resources.

TECHNICAL SKILLS

Cybersecurity: Web security basics, SQLi, XSS, API security, Log analysis, Auth mechanisms
Full-Stack: HTML5, CSS3, JavaScript, Node.js, Express.js, REST APIs, PostgreSQL, SQL, Git
Data Analytics: Python, Pandas, NumPy, Matplotlib, SQL, Excel, Exploratory Data Analysis
Core CS: C++, Java, Data Structures, Algorithms, OOP, Database Management Systems
